# *An Outstanding Gladiolus*

## KING WILLIAM

My first introduction—Originated by Wm. Schenetsky. I am introducing King William because of its beauty and unsurpassed performance and because I feel that such a remarkable glad should be in everyone's garden. Hundreds of bulbs have had a most thorough trial and have outgrown Picardy in two fields during the past four years. Trial garden reports substantiate my experience.

King William is a soft salmon and apricot blending beautifully into a clear unmarked cream throat. It is a tall, healthy, vigorous grower, a great shipper or commercial as well as a super exhibition variety.

## Foreword

In presenting this new 1940 list, I wish again to stress the fact that it contains the most dependable of the older standard varieties as well as the best of the newer ones. During recent years it has become increasingly evident that there is a growing demand for the graceful and beautiful smaller flowered gladiolus which lend themselves exceptionally well to vase and table decorations in an infinite number and variety of arrangements possible only with the small decoratives. In anticipation of this demand I have this year added quite a superlative collection of these small decoratives of both American varieties and Imported English Hybrids. As you will note elsewhere in this list, I am introducing a new variety (my first) because of its outstanding performance and beauty. I stake my reputation that this new gladiolus is a winner, both as a commercial and show table flower. Again, I take this opportunity of extending a cordial invitation to you to visit my fields during blooming season.
